### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102/103*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Derwent Abstract No. 2000-348550 (abstract of Russian Patent Specification No. 2133233C1).

The abstract teaches a binder composition comprising 30-50% clay; 5-10% lime; 0.6-1% sodium hydroxide, metallurgical production slag the balance and having a moisture content of 8-14%. The examiner has requested a formal translation of this document and will forward a copy of the translation upon receipt.

The instant claims are met by the reference as the reference teaches a composition that encompasses that which is instantly claimed. As for the amounts of the components, the amounts taught by the abstract overlap and/or encompass the amounts instantly claimed. It is the position of the examiner that blast furnace slag is

encompassed by the term "metallurgical production slag" absent evidence to the contrary.

In the event that applicant shows that blast furnace slag is not an example of a metallurgical production slag then it would have been obvious to one of ordinary skill in the art to substitute one slag for another without producing any unexpected results.

#### ***Information Disclosure Statement***

4. References AG, AH, and AI have been considered by the examiner to the extent of their abstract and the extent they were discussed on the International Search Report and they are not seen to teach and/or fairly suggest the instant invention. References AJ and AK were not considered as copies of the references were not received by the examiner and the examiner is unable to easily obtain these references.

#### ***References Cited By The Examiner***

5. The references are cited as showing the general state of the art and as such, they are not seen to teach or fairly suggest the instant invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony J. Green whose telephone number is 571-272-1367. The examiner can normally be reached on Monday-Thursday 6:30-4:00.
